

LABCORP DIAGNOSTIC ASSISTANT™ — QUICK REFERENCE GUIDE

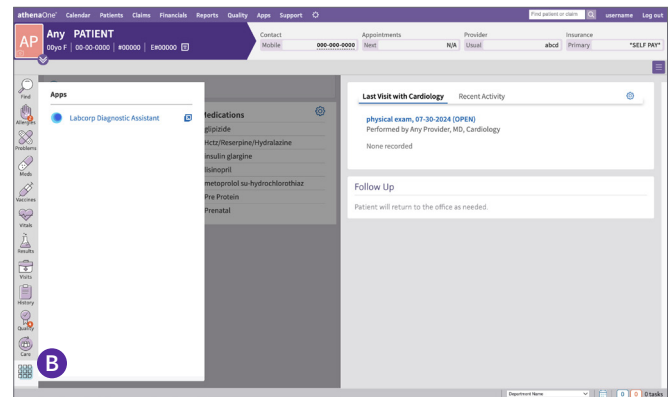

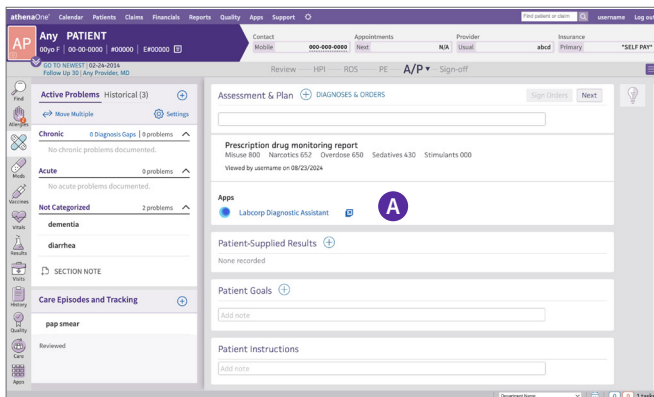

Using Diagnostic Assistant™ in Athena

Use this guide to quickly start accessing patient-centric Labcorp data and insights directly in your EHR.

1. Launch Diagnostic Assistant

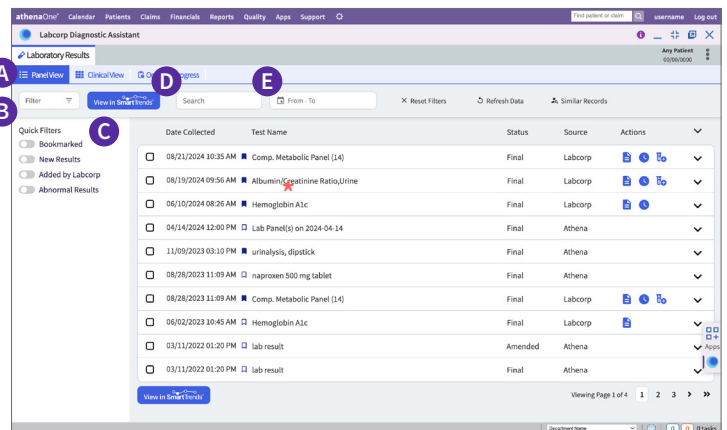

You can access Diagnostic Assistant from two places in the patient's chart:

- A** Providers primarily working from the History and Physical module in Athena: Go to the Assessment & Plan (A/P) section, and under Apps, click Labcorp Diagnostic Assistant
- B** All users: Use the left-hand menu, click Apps and select Labcorp Diagnostic Assistant from the list of partner applications

2. View combined Athena and Labcorp lab results

- A** From Laboratory Results tab, you can choose your preferred view as Panel View (results grouped by date), Clinical View (customized grouping based on clinical relevance) or Orders in Progress (Labcorp orders received but not yet resulted)
- B** Create custom filters to tailor your view
- C** Use quick filters to see the results that are bookmarked, newly added, Labcorp-only and/or abnormal
- D** To see trends, check the box next to desired results and click SmartTrends
- E** Search by test name, date, ordering provider, performing lab and more

3. Get details about the results

- A** See the source of the results (Athena or Labcorp)
- B** Expand entries for more detailed information
- C** Download Labcorp results as PDFs using the document icon
- D** Check order status with the clock icon
- E** Add tests to an order using the test tube icon

4. Dig deeper with SmartTrends™

- A** Filter lab results based on specific conditions
- B** Trend lab results on a single line, regardless of performing lab, ordering provider or source (Athena or Labcorp)
- C** See an integrated view of lab results, vitals, medications and other clinical data across a single timeline
- D** Identify gaps in care using evidence-based guidelines for selected conditions
- E** Click Missing Observations to find missing tests or other care gaps

Labcorp Diagnostic Assistant (Demo)

Find | Patient Name | Header | Input text

Test Finder

Quickly search Labcorp's comprehensive test menu using simple, conversational prompts, no exact test names or codes needed.

Example questions:

- What test is available for hemoglobin A1C?
- Does Labcorp offer thyroid reflex testing?
- What are the specimen requirements for PTH assay?

Ask a question to find a test

5. Access Labcorp Test Finder

- A** Click the Test Finder tab to open Labcorp's interactive search tool
- B** Ask questions in plain language to receive curated, clinically relevant test recommendations
