LABCORP DIAGNOSTIC ASSISTANT™ — QUICK REFERENCE GUIDE

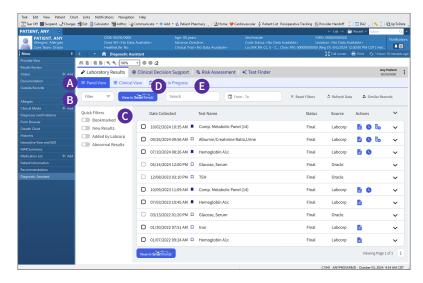

Using Diagnostic Assistant™ in Oracle Health

Use this guide to quickly start accessing patient-centric Labcorp data and insights directly in your EHR.

- 1. Launch Diagnostic Assistant
- A Access the patient's medical record and click
 Diagnostic Assistant from the menu on the left side
 of the screen

- 2. View combined Oracle Health and Labcorp lab results
- A From the Laboratory Results tab, you can choose your preferred view as Panel View (results grouped by date), Clinical View (customized grouping based on clinical relevance) or Orders in Progress (Labcorp orders received but not yet resulted)
- B Create custom filters to tailor your view
- C Use quick filters to see results that are bookmarked, newly added, Labcorp-only and/or abnormal
- To see trends, check the box next to the desired results and click SmartTrends
- E Search by test name, date, ordering provider, performing lab and more

Using Diagnostic Assistant™ in Oracle Health

- 3. Get details about results
- A See the source of the results (Oracle Health or Labcorp)
- B Expand entries for more detailed results information
- C Download Labcorp results as PDFs using the document icon
- D Check order status with the clock icon
- Add a test to an order using the test tube icon
- Dig deeper with SmartTrends™
- A Filter lab results based on specific conditions
- B Trend lab results on a single line, regardless of performing lab, ordering provider or source (Oracle Health or Labcorp)
- See an integrated view of lab results, vitals, medications and other clinical data across a single timeline
- D Identify care gaps using evidence-based guidelines for the selected condition
- Click Missing Observations to identify missing tests or other gaps in care
- 5. Access Labcorp Test Finder
- Click the Test Finder tab to open Labcorp's interactive search tool
- B Ask questions in plain language to receive curated, clinically relevant test suggestions
